Gbackup Compressed Storage

Storage space is billed at a rate per MB for the amount of data that resides on our servers after compression. We work off an estimated 50% compression ratio depending on the types of files you are backing up.

Remember that media files compression is minimal if any at all, whereas text based files and databases will compress extremely well. If you need any assistance in selecting the storage size required, please feel free to contact our sales team or email us at sales@gbackup.co.za or visit our website on www.gbackup.co.za
